

JMI Hydraulic Driven Submersible Mixed/Axial Flow Pump

Product Specification :

Type-JMV Series Vertical Mixed-Flow / Axial Flow pumps are suitable for agricultural irrigation and drainage or industrial water supply and drainage. It is applicable due to the site of lacks of power supply or during the heavy downfall whereby normal electrical operated pump is not recommended to operate.

Material Specification :

Impeller : Cast Iron or Bronze

Pump Body : Cast Iron

Shaft : High Tensile Steel or Stainless Steel

Seal : Mechanical Seal Or Gland Packing

Drive Unit :

Hydraulic Power Pack or Engine but must complied to the speed and power rating specified.

Capacity : Up to 1,000 litres / second

Head : Up 10.0 m

Efficiency : 75 – 83%
