

Engine Or Motor Driven Mixed Flow Pump

Product Specification :

Type-JMH Series mixed-flow pumps are suitable for agricultural irrigation and drainage or industrial water supply and drainage. They are used for conveying clean water supply and drainage. They are used for conveying clean water and the temperature shall not more than 40 degree C.

Material Specification :

Impeller : Cast Iron or Bronze
Pump Body : Cast Iron
Shaft : High Tensile Steel or Stainless Steel
Seal : Mechanical Seal Or Gland Packing

Drive Unit :

Motor or Engine but must complied to the speed and power rating specified.

Capacity : Up to 750 litres / second

Head : Up 15.0 m

Efficiency : 75 – 87%
