INTRODUCTION

We, **Simavis Engineering Sdn Bhd**, established its operation in year **2003**. We are in partnership with JMI.Co Ltd from Korea, a well know with more than 20 years' experience of Submersible Pump and associated products manufacture. Meantime, Simavis had evolved into a leading engineering company, we also an agent, trader, distributor, importer and exporter of a wide assortment of Water Treatment Plants & Wastewater Treatment Systems of which supported by worldwide international manufacturers. Simavis Today, we had earned name in the market for its quality products as well after sales services.

Some of our product range involved at the fields of industries includes Water Supply & Water Treatment Process, Wastewater & Sewage Treatment Process, and Cold Water Services for High-rise Building, Flood Control & Mitigation System, Fire Fighting System, Construction Dewatering & Drainage System, Water Features System and Industrial Chemicals & Industrial Pumping System.

Our strength lies in exceptional management team, trained and dedicated work force with continuously upgrading human resources skill.

Product and System we are currently present ours business by venture into design, fabrication, assembling, install as well testing and commissioning as below services but not the least:-

- Submersible Pump and associated Control System
- Non- Submersible Pump and associated Control System
- Variable Speed Drive associated Control System

To enhance and facilitate our business in the supply of municipal water supply and wastewater market Simavis had secured the approval from:-

- SPAN Approval – Water Supply
- SPAN Approval – Waste Water (Indah Water)
- Jabatan Bekalan Sabah (JAS)
- Jabatan Kerja Raya
- Jabatan Pengairan Salinan
- Ministry of Defend (MINDEF)
- Various M&E Consultant Firms

We have extended our business through Asia-Pacific Region by partnership with associated companies in Indonesia, Singapore, Thailand, Cambodia and Philippine.

Over the succeeding years, we recognise the importance of ensuring to pay serious attention to the efficiency and effectiveness of the performance of water and wastewater treatment facilities.

Historically we have observed that the operations and maintenance of plants are inadequate – particularly the water treatment and wastewater treatment plants. This could be result of an out of sight, out of mind attitude towards the plants as the direct impact of the quality of effluents on the plant is rarely apparent.

We have noticed that as Local Authority become more aware of their environmental responsibility, as well as the cost benefit of appropriate operations and maintenance plans, whereby **effective operations and maintenance plans translate to immense savings in the future as outlined below:-**

- Energy saving occurs through optimised operation as energy cost is annually escalating
- Asset management reduces or even eliminates plant shutdowns – this extends the life of the clients' mechanical equipment which removes the need for costly refurbishment
- Expensive mechanical equipment is replaced

Simavis understands that in certain instances there is a lack of resources and/or expertise to properly operate and maintain water and wastewater treatment works. Therefore we decided to expand our business involving in Maintenance and Servicing Contract in order to deliver a complete and holistic solution for our customers in particular to Local Authority. We have done this by not only supplying our clients with the products and associated equipment, but also by providing with Operations and Maintenance (O&M) services which are customised for their specific needs, based on the site requirement and specification as well the extent of their available operational and maintenance resources. This way we provide the customer and Local Authority in peace of mind that the system and plant will be operated properly and so will perform according to its design.

Our O&M service is not limited to the operations of new projects installations but include existing all water treatment plants and wastewater treatment plants, from small community plants to municipal works, are the targets for our service.

We strive to provide complete O&M solution for your treatment works from appointment of daily operators and management of staff, to sample analysis and mechanical maintenance.

Certainly an appropriate O&M plan and procedure that to be provides in line of ensuring optimal performance. It shall take into account of the **services outlined as below not limited to the following:**

- Appointment of process supervisors
- Treatment works surveys and feedback reports by process technician
- Sample analysis and interpretation
- Mechanical maintenance team
- Electrical maintenance team
- Process optimisation
- Operations and maintenance manual preparation or updating
- Weekly Plant Process Meeting
- General servicing and upgrading
- Supplying of spares (electrical, mechanical, instrumentation)

Simavis had built an excellent track record of Operation & Maintenance Services for these above mentioned system as well.
